About these figures

Only saved, reviewed numeric values are included. Missing data is shown as a dash; zero remains zero. Audience combines followers and subscribers. Cross-platform totals are not deduplicated people. Engagement rates use the portal's calculation: weighted by views when available, otherwise a simple average. Changes compare the preceding, non-overlapping published period. Period lengths and account coverage may differ.

Executive review

The saved narrative, highlights, and next steps for this period.

Key findings

September delivered a stronger audience response across the portfolio. The clearest opportunity is to turn that attention into a returning audience through consistent publishing and focused creative experiments.

What went well

1 Short-form content generated strong engagement across the active platforms.

What changed

1 Distribution expanded compared with the previous published period.

Needs attention

1 Profile visits should be monitored alongside audience growth.

Recommended next steps

1 Test two opening hooks in the next content cycle and compare results.

2 Maintain a consistent publishing schedule and review performance weekly.

Narrative text is reproduced in its saved language.

Platform performance

A clear view of how each channel contributed.

Views by platform

Bar lengths compare views across the platforms with reported data.
